In Alien fish, amphibian and reptile species in Romania and their invasive status: a review with new data. Travaux du Muséum National d'Histoire Naturelle "Grigore Antipa" 64 (1): 131–186.

The authors wish to make the following additions and corrections:

Page 138, line 32: "*Hemiculter bleekeri* Warpachowski, 1888. Common name(s): none in either English or Romanian (Froese and Pauly 2022). The species is native to Eastern Asia (Bănărescu 1968). It has been introduced unwittingly together with the other Asiatic cyprinids; it lived in fishponds but did not escape to free waters and has doubtlessly been eliminated along time (Bănărescu 1968)." should be added before *Toxabramis argentifer*.

Page 146, line 13: "Fam. Osphromenidae" should be "Fam. Osphronemidae".

PENSOFT

Page 149, line 8 and following: "it was present in the late 1990s–early 2000s in the lake in Tineretului Park, Bucharest, but was no longer found by us in 2020–2021 (Iftime and Iftime, pers. obs., 1990–2021)" should be: "it was present in the late 1990s–early 2000s in the lake in Tineretului Park, Bucharest, but was no longer found by us in 2020–2021 (Iftime and Iftime, pers. obs., 1990–2021); Gavriloaie (2008) also did not find it in Tineretului Park, but found it in a lake in Carol Park, where nowadays we have not found it (Iftime and Iftime, pers. obs., 2020–2021)".

Page 155, line 5: "Cioflec 2019a" should be "Cioflec 2019"

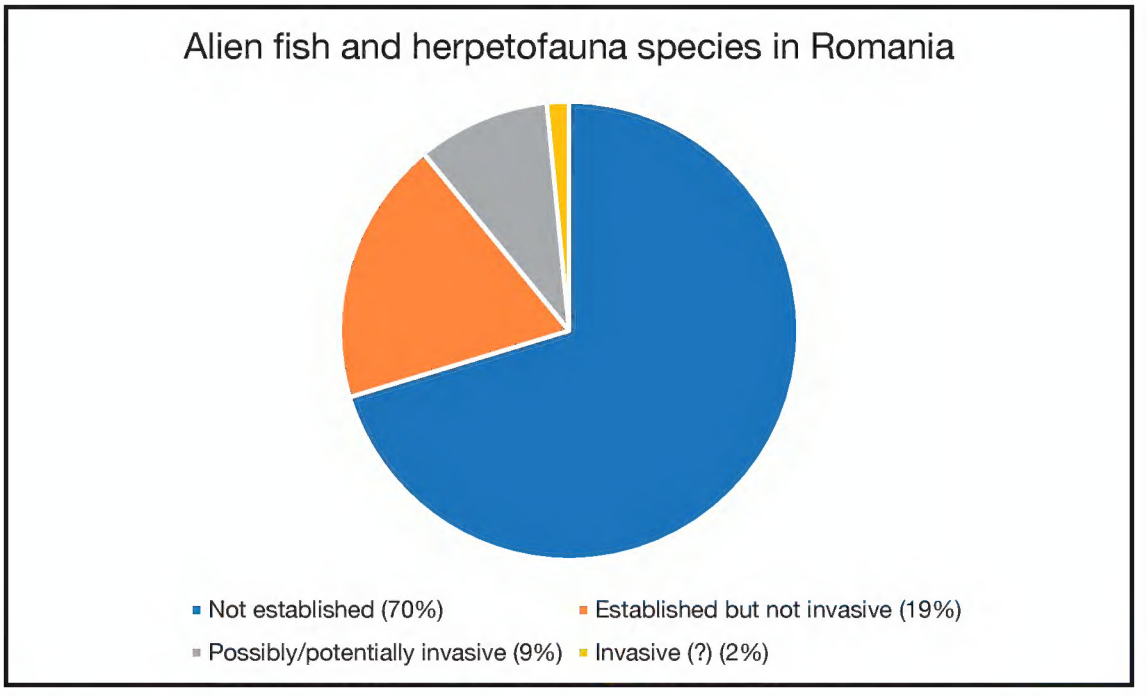
Page 159, line 11: "Cioflec 2019b" should be "Cioflec 2013".

Page 167: Table 1: the following row should be added after "*Hemiculter leucisculus*":

Hemiculter bleekeri	No	No

Page 169, line 3: "49 fishes" should be "50 fishes"

Page 169. Figure 18 should be as follows:



Alien fish and herpetofauna species in Romania
Not established (70%)
Established but not invasive (19%)
Possibly/potentially invasive (9%)
Invasive (?) (2%)

Figure 18. Established and invasive status of alien fish and herpetofauna species in Romania (invasivity criteria after IUCN and Romanian law).
